

Douglas **Moth**

Full Stack Web Developer

PROFILE

Motivated Full Stack Web and Application Developer with a strong foundation in modern programming languages, component-based architectures, responsive design, and API-driven applications. Brings years of hands-on technical, installation, and project management experience, with a proven ability to translate client requirements into functional, user-focused digital solutions. Known for a detail-oriented approach, clear communication, and effective collaboration within cross-functional teams. Offers practical strengths in team leadership, scheduling, budgeting, and problem-solving gained from complex AV, IT, and networking environments, and is dedicated to continuous learning and delivering high-quality, maintainable software within forward-thinking development teams.

TECHNICAL SKILLS

- **Languages:** C#, JavaScript, PHP, Python, HTML5, CSS3
- **Frameworks and Libraries:** .NET, React (functional components, hooks)
- **Web and Backend:** Node.js, REST APIs, Dynamic Web Applications with jQuery
- **Databases:** MySQL, SQL Programming
- **Mobile Development:** Android Development, iOS (Swift), Mobile web applications, Cloud-hosted backends (AWS)
- **Concepts:** Object-Oriented Programming, Responsive Design, Component-based architecture
- **Tools & IDEs:** Visual Studio Code, Eclipse, Android Studio, Swift and Git

EDUCATION

Diploma in Web and Application Development (2024 – 2025)
CDI College

Network Systems Engineer (2013 – 2015)
CDI College

E-Commerce and Business Management Honors Diploma (2002 – 2004)
Sprott Shaw College

CORE COMPETENCIES

- **Full Stack Application Development:** Designing and building end-to-end web and mobile applications using modern front-end frameworks, backend services, and relational databases.
- **Front-End Engineering:** Developing responsive, component-based user interfaces with JavaScript, React, HTML5, and CSS3, with a focus on usability and maintainability.
- **Back-End Development & APIs:** Implementing server-side logic, RESTful APIs, and data integration using Node.js and relational databases.
- **Database Design & SQL:** Working with MySQL and SQL to design schemas, write queries, and support data-driven applications.
- **State Management & Application Flow:** Managing application state, side effects, and data flow within component-based architectures.
- **Technical Problem Solving & Debugging:** Diagnosing and resolving issues across front-end, backend, and integration layers.
- **Version Control & Collaboration:** Using Git to manage source code, collaborate with teams, and maintain clean, traceable change histories.
- **Requirements Analysis & Solution Design:** Translating business and client requirements into technical solutions, application features, and system workflows.
- **Testing, Documentation & Maintainability:** Writing clear documentation and maintaining readable, maintainable code to support long-term application health.
- **Continuous Learning & Adaptability:** Rapidly learning new frameworks, tools, and patterns to meet evolving technical and business needs.

CAREER HIGHLIGHTS

Web and Application Developer (2025 – Present)

Bells and Whistles Designs

- **Projects and code samples:** GitHub <https://github.com/bellsandwhistlesdesigns/bellsandwhistlesdesigns.github.io>
- **Developing and maintaining responsive, scalable, and visually engaging web and mobile applications** using modern development practices, clean code standards, and strong UI/UX principles to ensure functionality across platforms and devices.
- **Managing all facets of the development lifecycle**, including planning, coding, testing, debugging, deployment, and ongoing support—gaining hands-on experience with real-world projects while sharpening technical expertise.
- **Verified Google Play Developer actively building and preparing to publish first Android application**, integrating modern app design, secure coding practices, and user-centered functionality.

Team Lead / Field Installer (2020 – 2024)

PJS Systems ProSound

- **Led on-site project management for large-scale commercial AV installations**, overseeing budgeting, scheduling, resource allocation, drawings/blueprint interpretation, and coordination with contractors and clients to ensure smooth execution across multiple sites.
- **Directed weekly team meetings, supervised installation crews, and managed inventory and equipment logistics**, ensuring proper materials were available on-site and workflows stayed on schedule and within budget.
- **Performed hands-on installation and termination of AV, data, and control cables; built and configured AV network racks; and installed LED wall panels, projectors, speakers, and related systems** in compliance with technical specifications and safety standards.
- **Successfully contributed to major projects including Langara College, Tasty Indian Bistro (\$800K in AV equipment), and UBC (\$2.8M AV infrastructure project)**, consistently delivering high-quality, professionally executed installations.

Data and Security Installation Technician / Owner (2018 – 2020)

Smart Connex Inc.

- **Owned and operated a low-voltage data cabling and security installation business**, completing residential and commercial contracts involving structured cabling, network setup, and multi-camera surveillance systems.
- **Managed all phases of each project—planning, estimating, customer communication, technical installation, troubleshooting, and quality assurance**—ensuring every job was completed safely, professionally, and in alignment with client requirements.
- **Installed and tested data lines, configured routers/switches, mounted and calibrated security cameras, and optimized network performance**, delivering reliable system functionality and clear end-user documentation.
- **Oversaw scheduling, budgeting, vendor coordination, and on-site workflow**, ensuring projects stayed on track while consistently providing strong customer service and repeat-client satisfaction.

Network Administrator / Service Coordinator (2015 – 2018)

Logic Managed IT Services

- **Coordinated all incoming service desk requests**, triaging tickets, prioritizing workflow, and ensuring client issues were resolved efficiently and in alignment with Service Level Agreements (SLAs).
- **Led daily team meetings to review workloads, troubleshoot technical challenges, and maintain clear communication**, supporting a well-organized and responsive service environment.
- **Monitored business analytics and service metrics** to track performance, identify trends, and make data-driven recommendations that improved team efficiency and client satisfaction.
- **Prepared and configured customer equipment—including servers, network security devices, and employee laptops**—ensuring systems were properly staged, updated, and ready for deployment.
